HUSSMANN

Insight® IC2XSL-C

Dairy / Delicatessen / Meat

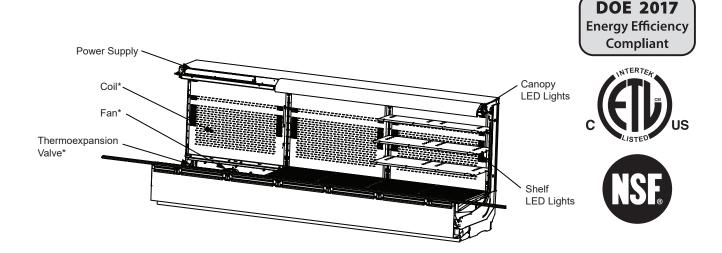

Merchandiser Data Sheet

P/N 3055085_A

NSF® Certified

February 2018

Insight standard field electrical connections are at the bottom of the merchandiser

*Coils, fans and TXVs are modular with one per 3 or 4 foot section.

Portion of parts removed for clarity.

12 foot merchandiser shown.

NSF Certification

This merchandiser model is manufactured to meet NSF/ANSI (National Sanitation Foundation) Standard #7 requirements for construction, materials and cleanability.

Fan Speed ⁷	IC2XSL-C8, 12 (7.0")	1600	1700 ⁷	1700 ⁷	1600

Notes

- 1. All data based on store temperature and humidity that does not exceed NSF Type 1 ambient conditions of 75°F and 55% relative humidity except where noted.
- 2. Average evaporator temperature shown. Use dew point for high glide refrigerants for unit sizing. Care should be taken to use the dew point in PT tables for measuring and adjusting superheat. Adjust evaporator pressure as needed to maintain discharge air temperature shown.
- 3. Data for operation in NSF Type 2 ambient of 80°F and 55% relative humidity.
- 4. AHRI 1200 Rating Point for energy consumption comparison only.
- 5. Subtract 120 Btu/hr/ft (115.4 Watts/m) for front glass (on applicable models).
- 6. Add 10 Btu/hr/ft (9.6 Watts/m) per shelf row for LED shelf light fixtures.
- 7. Some lengths and/or applications require optional fan speed control kits applied by the Hussmann Product Configurator.

Estimated Charge ¹⁰ **IC2XSL-C 8 ft** 1.5 lb 24 oz 0.7 kg

12 ft 2.9 lb 46.4 oz 1.3 kg

¹⁰ This is an average for all refrigerant types. Actual refrigerant charge may vary by approximately half a pound.

Product Data

 Gross Refrigerated Volume 11 (Cu Ft/Ft)
 4.9 ft³/ft (0.46 m³/m)

 AHRI Total Display Area 12 (Sq Ft/Ft)
 3.33 ft²/ft (1.01 m²/m)

 Shelf Area 13 (Sq Ft/Ft)
 6.38 ft²/ft (1.94 m²/m)

⁹ Use a Temperature Pressure Chart to determine PSIG conversions.

¹¹ AHRI Gross Refrigerated Volume: Refrigerated Volume/Unit of Length, ft³/ft [m³/m]

¹² Computed using AHRI 1200 standard methodology: Total Display Area, ft² [m²]/Unit of Length, ft [m]

¹⁹ Shelf surface area is composed of bottom deck plus standard shelf complement for this model: (3) rows of shelves: 12-in., 16-in., 18-in.

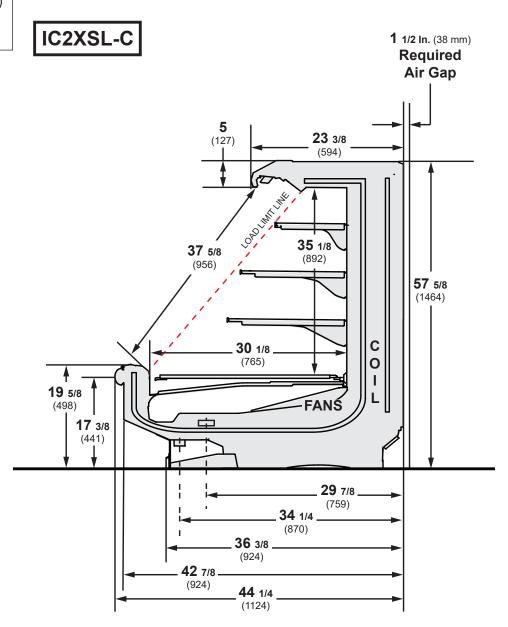

DOE 2017 Energy Efficiency Compliant

Hussmann refrigerated merchandisers configured for sale for use in the United States meet or surpass the requirements of the DOE 2017 energy efficiency standards.

Dimensions shown as in. and (mm).

Shelf complement shown as tested:

Three rows of shelves (12", 16", 18") spaced equally between bottom display pan and interior top panel.

NSF Certification

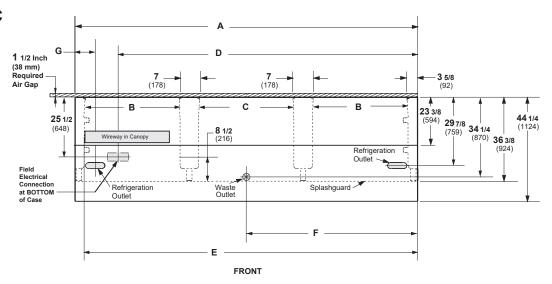

This merchandiser model is manufactured to meet NSF/ANSI (National Sanitation Foundation) Standard #7 requirements for construction, materials and cleanability.

Shelf Options

Approved shelf sizes for standard (horizontal, 2-3 position brackets) displays:

12-inch

16-inch

14-inch

18-inch

20-inch

Contact engineering for non-standard (4 position brackets or other) display recommendations.

Minimum number of Shelves: 2

Optimal number of Shelves: 3

Maximum number of Shelves: 3

Maximum number of Lighted Shelves: 3

Standard shelf complement for test purposes: (3) rows of shelves (12", 16", 18"), evenly distributed vertically.

Fan Wiring Offtime Defrost

Canopy LED Light Circuits

EcoShine II LED Canopy Lighting - 1 Row

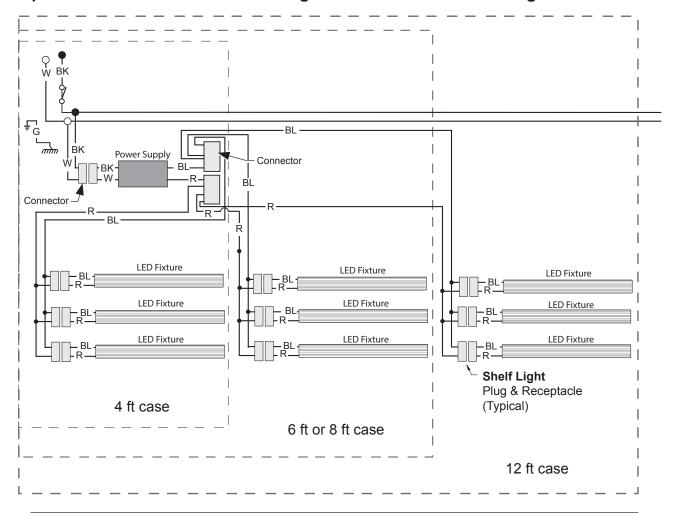

WARNINGAll components must have mechanical ground, and the merchandiser must be grounded.

Optional Shelf Lighting — LED Fixtures

Optional Shelf Harness and LED Light Circuits for 3 Rows of Lighted Shelves

WARNING

All components must have mechanical ground, and the merchandiser must be grounded.

Estimating Refrigeration and Electrical Load (for comparison purposes only)

Case Btu

To determine Btu for a case, refer to the performance data chart on page 2. Select lit or unlit shelves, then select the type of remote refrigeration system (parallel or conventional), which will give Btu/hr/ft. Multiply this number by the length of the case to determine Btu per hour. Add 10 BTU per foot per hour for each row of LED shelf lights.

Case Electrical

Refer to store legend to determine number of circuits. Lighting should be specified in store legend.

Fan electrical load for a case is computed by selecting the case length and fan voltage on page 6. For example, a 12 ft case uses 3 fans. The store legend specifies fans on a 230V circuit. In this instance, fans use 0.21 Amps and the MCA is 0.41. When applied, ambient fans, anti-sweat heaters, controllers, etc. must be included in the MCA. Include lights in the MCA if lights are on same circuit.

Lights may be on a separate circuit. To estimate lighting load: select case length (12 ft), canopy lighting [standard or optional] (here 0.70 for standard), and shelf or rail lighting [maximum for which case is wired] (0.74 for three shelves); then add together [0.48 + 0.74 = 1.22 amps for 120V] (for 230V, multiply 1.22 * 0.52 = 0.63).

Line Sizing — Refer to store legend.

Hussmann Line Sizing Charts are engineered for use with Hussmann refrigeration equipment.
